

RESOURCE MANAGEMENT STAFF

STAT

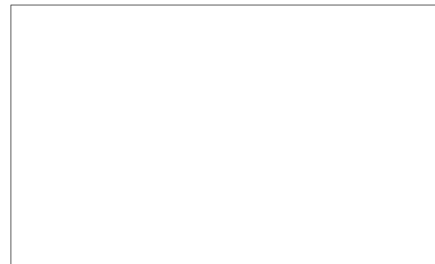

Since this initial OMB data request seems to be forthcoming, and will cause consternation among our NFIP components who are affected, (CIA, DIA and NSA), you might want to mention this to [] and he might want to tip off the DCI.

STAT

[] of Jim Taylor's office suggests that the DCI might be asked if he would talk to McIntyre or the President to see if intelligence, as a functional activity, might be exempted from this drill. I suggest the DCI not do this at this time but wait to see what will be the result of the data calls. If it then appears that we will take a bath, perhaps we might want to use our top card--but I don't think it would be profitable right now.

STAT

In the meantime, I am staying in touch with both OMB and State to try and obtain a copy of the overseas report.

ACTION

- I thought ADP Management was what we are about.
